2022 Merit-based Incentive Payment System (MIPS) Final Score Preview

Purpose

This document answers key questions (with supporting screenshots) about the MIPS Final Score Preview now available in performance feedback for practice representatives, MIPS Alternative Payment Model (APM) Entity representatives, individual clinicians, and virtual group representatives.

Third party representatives such as Qualified Clinical Data Registries (QCDRs) and Qualified Registries can’t access your performance feedback.

Fast Facts About Final Score Preview

What Is Final Score Preview?
The Final Score Preview period is a phase of MIPS performance feedback that gives clinicians the opportunity to preview their final score before the release of payment adjustment information. As a reminder, your 2022 final score will determine your 2024 MIPS payment adjustment.

The purpose of the MIPS Final Score Preview period is to provide more transparent communication and improve the feedback process based on experiences from prior performance years. We want to make sure your final scores are as accurate as possible and that we identify any potential issues before we calculate payment adjustments.

- We encourage you to sign in and preview final scores now and to contact the Quality Payment Program (QPP) Service Center with questions or concerns.

What Data Are Available During the Final Score Preview Period?
During the Final Score Preview, performance feedback will display data associated with the highest final score that could be attributed to the clinician, group or APM Entity, and all the data required to calculate final scores, which includes:

- Performance category-level scores and weights
- Bonus points
- Measure-level performance data and scores
- Activity-level scores

Final Score Preview won't include payment adjustment information or patient-level reports.

Who Can Access MIPS Final Score Preview?
MIPS Final Score Preview is accessible to clinicians and authorized representatives of practices, virtual groups, and APM Entities (including Shared Savings Program Accountable Care Organizations [ACOs]), whether they reported traditional MIPS or the APM Performance Pathway (APP).

- Practice representatives with the Staff User or Security Official role can preview MIPS final scores from individual and/or group participation (if the practice participated at the group level).
- APM Entity representatives with the Staff User or Security Official role can preview MIPS final scores for their APM Entity.
- If you’re a Medicare Shared Savings Program ACO’s QPP Security Official or QPP Staff User contact in the ACO Management System (ACO-MS), then you can preview the ACO’s MIPS final score by signing in to the QPP website using your ACO-MS username and password.
- Virtual group representatives with the Staff User or Security Official role can preview MIPS final scores from virtual group participation.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
• Individual clinicians with the Clinician role can preview their final score from individual, group, virtual group, or APM Entity participation.

Please review Appendix C more information about what you can and can’t see during the MIPS Final Score Preview period based on your access.

How Do I Access Performance Feedback to Preview MIPS Final Scores?
• Sign in to the Quality Payment Program website.
• Click “Preview Final Score” on the home page or select “Performance Feedback” from the left-hand navigation.
  o Acknowledge that you understand scores can change.
• Select your organization (Practice, APM Entity, Virtual Group).
  o Practice representatives can access both individual and group feedback through the practice organization.

Can My Scores Change During the Final Score Preview Period?
Yes, scores could change between now and August if we identify any issues during the MIPS Final Score Preview period that require system-wide scoring changes.

What If There’s an Error with the Data Displayed During the MIPS Final Score Preview Period?
Contact the Quality Payment Program Service Center by email at OPP@cms.hhs.gov, create a OPP Service Center ticket, or by phone at 1-866-288-8292 (Monday – Friday, 8 a.m. – 8 p.m. ET). People who are deaf or hard of hearing can dial 711 to be connected to a TRS Communications Assistant.

Please note that issues raised during the MIPS Final Score Preview period aren’t part of targeted review. The targeted review process allows clinicians to request a review of their MIPS payment adjustment calculation and will be available once we release MIPS payment adjustment information.

When Will MIPS Payment Adjustments Be Available?
We anticipate that final performance feedback, including MIPS payment adjustment information, will be available in August 2023. After the release of payment adjustment information, there will be a 60-day- targeted review period during which clinicians can request a review of their MIPS payment adjustment calculation.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
COVID-19’s Impact on 2022 Performance Feedback

The 2019 Coronavirus (COVID-19) public health emergency continued to impact clinicians across the United States and territories. We recognize, however, that not all practices have been impacted by COVID-19 to the same extent. For the 2022 performance year, we continued to use our Extreme and Uncontrollable Circumstances (EUC) policy to allow MIPS eligible clinicians, groups, virtual groups, and APM Entities to submit an application requesting reweighting of one or more MIPS performance categories to 0% due to the current COVID-19 public health emergency. Clinicians with an approved EUC for all 4 categories and didn’t submit any data, or who only submitted data in one performance category, will automatically receive a neutral payment adjustment in 2023.

Any performance category for which an individual clinician didn’t submit data is weighted at 0% for the 2022 performance year.

Appendix A outlines performance category weights and payment adjustment implications based on data submission by individual clinicians.

We also extended the deadline for our MIPS EUC Exception application to March 2, 2023.

- **Group and virtual groups** could request reweighting of one or more performance categories to 0%; data submission overrode performance category reweighting on a category-by-category basis.
- **APM Entities** were required to request reweighting of all performance categories and data submission didn’t override reweighting.
- Appendix B outlines performance category weights and payment adjustment implications based on the performance categories selected in approved applications.

**Exception:** Clinicians who participate in an APM — and groups and virtual groups that include these clinicians — qualify for automatic credit in the improvement activities performance category. Submitting data for the quality and/or Promoting Interoperability performance categories triggered this automatic credit and overrode reweighting, making the category eligible for scoring.

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Accessing Final Score Preview (Performance Feedback)

Before You Begin
If you don't already have a HCQIS Authorized Roles and Profile (HARP) account or access to your organization on the QPP website, you'll need to create an account, request access, and wait to be approved.

- More information is available in the QPP Access User Guide (ZIP, 4.1 MB).

Please note that due to a mandatory federal-wide security update, you’ll need a CMS-supported version of Microsoft Edge or Chrome to access the QPP website. You may encounter errors if you use a different web browser.

- Please update your browser to the latest version of Microsoft Edge or Chrome.

How Can I Access My/Our MIPS Performance Feedback?
You can access Final Score Preview in your performance feedback through the QPP website by signing in with the same credentials that allowed you to submit and view data during the submission period.

Please note that if you are a Shared Savings Program ACO’s QPP Security Official or QPP Staff User contact in the ACO Management System (ACO-MS), then you can preview the ACO’s final score by signing in to the QPP website using your ACO-MS username and password. For guidance on how to add the QPP Security Official and QPP Staff User contacts to an ACO in ACO-MS, please refer to the ACO-MS User Access and ACO Contents Tip Sheet.

If you don’t have an account or role for your organization, refer to the following resources for information on creating an account and requesting a role for your organization.

- QPP Access User Guide (ZIP, 4.1 MB)
- How to Create a QPP Account video
- Connect to an Organization: Practice video
- Connect to an Organization: APM Entity video
- Connect to an Organization: Virtual Group video
- Request the Clinician Role video

See Appendix C for more information about what you can and can't view during Final Score Preview based on your credentials.

Note: We’ve updated the workflow for some of these actions since recording these videos to improve your experience.
After signing in, select **Preview final score** or **Performance Feedback** in the left-hand navigation pane.

Before selecting **Okay**, you must acknowledge that you’re previewing your final score and that scores could change.

---

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
I’m a Clinician. What’s the Best Way for Me to Access My Performance Feedback?

The Clinician role will let you view your performance feedback for all of your associated practices without requesting access to each practice or gaining access to information about other clinicians in your practice.

If you’re a clinician in a MIPS APM, this role also lets you directly access performance feedback based on your APM Entity’s reporting via traditional MIPS and/or the APP.

Please review the Register for a HARP Account and Connect as a Clinician documents in the QPP Access User Guide (ZIP, 4.1 MB).

Can Third Party Intermediaries Access Final Score Preview in Performance Feedback?

Performance feedback (including Final Score Preview) can only be accessed by authorized practice representatives. The Centers for Medicare & Medicaid Services (CMS) doesn’t grant direct access to performance feedback for third party intermediaries (including QCDRs and Qualified Registries) because it contains sensitive information, including payment and patient information.

Third party intermediaries with an account and a role for their Registry (or QCDR) organization can still access their dashboard and view the measures and activities they submitted on behalf of their clients, and the related scoring information. However, they won’t see:

- Data submitted directly by their client or by another third party intermediary.
- Quality or cost measures that CMS calculates from administrative claims.
- Patient-level reports for administrative claims measures.
- Final score or payment adjustment information.

To view their clients’ performance feedback, third party intermediaries will need to submit a request for a role for each practice (identified by Taxpayer Identification Number, or TIN), virtual group, or APM Entity they represent. The Security Official for each organization will decide whether to approve the request, authorizing the third party intermediary to access performance feedback and all other information available for the organization once signed into the QPP website.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What’s the Difference Between the Performance Feedback and Reports Tabs?

Some users may notice the Reports tab in their left-hand navigation panel.

You’ll access your 2022 MIPS performance feedback through the Performance Feedback tab.

The Reports tab is where some users will find:
- Historical CMS Web Interface reports for groups that have reported quality measures through the CMS Web Interface in previous years.
- Patient-level reports for quality and cost administrative claims measures (available in August).
- Historical payment adjustment reports.
Navigating Into Performance Feedback: Practice Representatives

This section assumes you have either the Staff User or Security Official role for a Practice organization. (This is distinct from access to a virtual group and/or APM Entity organization.)

- Practice representatives can view feedback for individual clinicians and the group (if the practice participated as a group).

From Performance Feedback, select View Practice Details to access group- or clinician-level performance feedback.

You can also select Download Data to access:
- Your Submission Data (data submitted for your entire practice, which may or may not contribute to your final score).
- Your Connected Clinician List.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Select View group feedback to the right of the practice name to access performance feedback based on group participation (aggregated data submitted on behalf of all clinicians in the practice).

Select View Individual Feedback to the right of the clinician’s name to access performance feedback based on individual participation (i.e., an individual clinician’s data).

Continue with these Frequently Asked Questions or skip ahead to walk through the rest of your feedback.

Our Practice Didn’t Participate/Submit Data as a Group. What Will We See in Performance Feedback During Final Score Preview?

If your practice didn’t submit data as a group for the 2022 performance year, you’ll see a message indicating that your clinicians only reported as individuals:

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
• “All clinicians in this practice reported as individuals. They’ll each receive a separate final score.”

You can View Individual Feedback for each connected clinician.

We’ll also make administrative claims quality measure scores available for informational purposes if they can be calculated.

What’s a “Connected Clinician,” and Who’s Included in This List?

Connected clinicians are all of the clinicians, identified by the National Provider Identifier (NPI) associated with your practice (TIN) through Medicare Part B claims billed between 10/1/2021 and 9/30/2022, regardless of their individual MIPS eligibility. Your connected clinicians are displayed on the Practice Details page of performance feedback and can also be accessed through the Connected Clinicians List comma-separated values (CSV) download on the main Performance Feedback page.

• Clinicians who started billing claims under your TIN between 10/1/2022 and 12/31/2022 will appear in the Payment Adjustment CSV download once final performance feedback is released in August.

Our Practice Includes Clinicians Who Participated in a MIPS APM. What Performance Feedback Will We See?

When you sign in with practice credentials, you’ll be able to preview final scores based on the data your practice submitted to QPP at the group or individual level. You won’t be able to preview final scores at the APM Entity level (if applicable). As a reminder, the APM scoring standard is no longer applicable, and clinicians in MIPS APMs had the option to report traditional MIPS and/or the APP at the individual, group and/or APM Entity level.

We Participate in a Virtual Group. Why Don’t I See Our Performance Feedback?

Representatives of solo practitioners and practices participating in a virtual group must have a Staff User role connected to the virtual group to access the virtual group’s performance feedback. These permissions are different than the ones that let you access information specific to your practice. Please review the Connect to an Organization document in the QPP Access User Guide (ZIP, 4.1 MB).

Any data submitted by individual clinicians, solo practitioners, or TINs within the virtual group will be considered voluntary and not eligible for a payment adjustment.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Navigating Into Performance Feedback: APM Entity Representatives

This section assumes you have either the Staff User or the Security Official role for an APM Entity organization. (This is distinct from access to a practice and/or virtual group organization.)

The following programs and models can review 2022 MIPS performance feedback, if applicable and available:

- Shared Savings Program ACO
- Bundled Payments for Care Improvement (BPCI) Advanced
- Comprehensive End-Stage Renal Disease (ESRD) Care (CEC)
- Independence at Home Demonstration
- Maryland Total Cost of Care (TCOC)
- Vermont All Payer ACO
- Oncology Care Model (OCM)
- Primary Care First (PCF)

From Performance Feedback, select View APM Entity Feedback to access APM Entity-level performance feedback.

If you have access to multiple types of organizations (such as an APM Entity and a practice), make sure to select the APM Entities tab.

Continue with these Frequently Asked Questions or skip ahead to walk through the rest of your feedback.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Can We Access a List of the Clinicians Associated with Our APM Entity?

Yes. You can download this list by clicking “View Participant Eligibility” from the Eligibility & Reporting tab. Make sure that you’re looking at the Performance Year 2022 page.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Once you land on the APM Entity Details & Participants screen, you can click “Download Participant List” for a list of all participating practices and clinicians associated with the APM Entity.

You can also click “View Clinician Eligibility” for any of the practices to view the clinicians within that practice.

What Should We Expect to See in Feedback?

Users with access to the APM Entity (i.e., a Staff User or Security Official role for the APM Entity organization) will be able to preview:

- The APM Entity’s final score.
- Performance category scores (quality, improvement activities, Promoting Interoperability, as applicable).
- A report of the individual and/or group Promoting Interoperability performance category scores that contributed to the APM Entity’s Promoting Interoperability score.
- Measure-level scoring for quality measures reported by the APM Entity.

Can Individual Clinicians View Our APM Entity Feedback?

Yes. Individual clinicians in the APM Entity can preview their final score from the APM Entity if they have the clinician role or if they have been approved as a staff user for the APM Entity.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Representatives of Shared Savings Program ACO Participant TINs and practices with clinicians receiving their APM Entity’s final score won’t be able to access the APM Entity’s performance feedback unless they have been approved as a staff user for the APM Entity.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Navigating Into Performance Feedback: Individual Clinicians

Note: This section assumes you’re a clinician with the Clinician role. (This is different from the Staff User role for a practice, APM Entity, or virtual group organization).

From Performance Feedback, you’ll see a list of all your associated organizations (practices, APM Entities, and virtual groups).

Select View Individual Feedback to access your performance feedback associated with this organization. Your feedback at an organization may be based on individual, group or MIPS APM participation.

How Do I Identify My Associated Organizations in Performance Feedback?

You should see the same associations on the Performance Feedback tab as you see for the 2022 performance year in the QPP Participation Status Tool or on the Eligibility & Reporting page when you sign in to the QPP website. Click “View Individual Feedback” to preview your final score as well as any individual data you may have submitted.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Navigating Into Performance Feedback: Virtual Group Representatives

This section assumes that you have either the Staff User or the Security Official role for a Virtual Group organization. (This is distinct from access to a practice and/or APM Entity organization.)

From Performance Feedback, select View Group Details to access virtual group-level performance feedback.

Can the Practices and/or Solo Practitioners Who Participate in Our Virtual Group Access Our Performance Feedback?

Yes, but only if they have an approved Staff User role for your virtual group. This means they are connected to your virtual group organization and requested the Staff User role; these permissions are different than the ones that let them access information specific to their practice. For more information, review the Connect to an Organization document in the QPP Access User Guide (ZIP, 4.1 MB).

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Can I Access a List of the Clinicians Participating in Our Virtual Group?
Yes. You can access a list of clinicians associated with each practice in the virtual group. Select View Practice Details next to each practice name.

We Have Clinicians in Our Virtual Group Who Participate in a MIPS APM. What Kind of Performance Feedback Will We See?
You'll see performance feedback based on the data you submitted to QPP at the virtual group level. Please note that that clinicians participating in a virtual group will always get the virtual group’s final score, even if they also participate in a MIPS APM.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Overview: Final Score Preview

When you navigate into feedback, you’ll land on the Overview page. From here, you can preview:

- Your final score, which will be based on reporting for traditional MIPS or the APP
- Your score and the weight for each MIPS performance category

As a reminder, there won’t be any payment adjustment information on the Overview page during Final Score Preview.

How Is Our Final Score Determined?

Your final score is the sum of your performance category scores and any points awarded for the complex patient bonus.

Note: If a clinician participated in MIPS multiple ways — for example, your practice reported traditional MIPS at the group level and the clinician also reported as an individual — we’ll assign the highest score that could be attributed to the clinician under that TIN/NPI combination. Users with access to an APM Entity will only be able to access performance feedback and the final score for the APM Entity, and they won’t see if the participating clinicians have a higher score from individual or group participation.
How Can I See More Information About the Different Performance Categories?
For individual, group, and virtual group feedback, you can access the scoring details for each performance category by clicking “View Details” on the Performance Category Overview cards below.

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What Is the Complex Patient Bonus?

The MIPS Complex Patient Bonus aims to protect access to care for vulnerable, medically complex patients by awarding bonus points to the clinicians who care for them. This bonus is comprised of 2 components that are added together to form your score:

**Medical Complexity**
This component uses the Hierarchical Condition Categories (HCC) Risk Scores of your patient population. These scores are assigned to each Medicare patient based on the severity of their acute or chronic conditions and are an indicator of medical complexity.

**Social Risk**
This component uses the Dual Eligibility Ratio of your patient population. Dual Eligibility is a common indicator of social risk and refers to patients that are eligible for both Medicare and full- or partial-benefits under Medicaid.

How Is the Complex Patient Bonus Calculated?

We updated the way we calculate the complex patient bonus beginning with the 2022 performance year. To learn more about these calculations, click **View Details** on the Complex Patient Bonus card.

Why Am I Not Eligible for the Complex Patient Bonus?

The complex patient bonus is **now limited** to MIPS eligible clinicians, groups, virtual groups and APM Entities with at least one risk indicator (either average HCC risk score or dual eligibility ratio) at or above the median risk indicator calculated for all MIPS eligible clinicians, groups, virtual groups and APM Entities from the prior performance year.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
From the Overview page, you’ll see a message indicating that you’re not eligible for this bonus. Click View Details to learn more about this calculation and why you’re not eligible.

Did you know?

We'll display the complex patient bonus (if it can be calculated) for informational purposes for:

- Clinicians who weren’t eligible for MIPS at the individual level but voluntarily reported as an individual.
- Clinicians who were individually eligible but didn’t submit data and are receiving a score equal to the performance threshold because they qualified for the automatic EUC policy.
- Practices that weren't eligible for MIPS at the group level but voluntarily reported as a group.
- Practices that were (1) eligible for MIPS at the group level and (2) didn’t report as a group and (3) had either Administrative Claims Quality Measures or Items and Services data available for informational purposes.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Why Do I See “N/A” for One or More Performance Categories?

When you see “N/A” instead of a score for a performance category, this means that the category was reweighted to 0% of your final score.

- MIPS eligible clinicians, groups and virtual groups will see “N/A” for every performance category they selected in an approved COVID-19 EUC application, unless data was submitted for that category.
- **Reminder**: Clinicians who participate in an APM — and groups and virtual groups that include these clinicians — qualify for automatic credit in the improvement activities performance category. Submitting data for the quality and/or Promoting Interoperability performance categories triggered this automatic credit and overrode reweighting, making the category eligible for scoring.

We’re a Participant TIN in a Shared Savings Program ACO That Reported the APP. Why Do We See a Score of Zero for the Quality Performance Category?

Participant TINs see a quality score of zero because the APP quality measures are reported by the ACO, not the group.

**Please note**: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
• Participant TINs that reported Promoting Interoperability data for the APP as a group will see a group final score based on the Promoting Interoperability data they reported and the 100% automatic credit for the improvement activities performance category.

• Participant TINs won’t see the final score attributed to the ACO. Only authorized representatives of the ACO (users with the Staff User or Security Official role for the ACO) or MIPS eligible clinicians in the ACO with the Clinician Role can access the ACO’s final score.

However, the MIPS eligible clinicians in the ACO will receive the highest final score and associated payment adjustment that could be attributed to their TIN/NPI combination.
Traditional MIPS: Quality

When you navigate into the quality section, you may see quality measures divided in up to 2 groups:

1. Measures whose performance points and bonus points count toward your quality performance category score. The measure score will display the sum of your performance and bonus points.

![Quality Measures](image)

2. Measures that contribute zero points to your quality performance category score. You'll see “N/A” in the measure score.

![Zero Points Measures](image)

We Submitted More Than 6 Measures. How Did You Determine Which Ones Counted Towards Our Quality Performance Category Score?

If you submitted more than 6 measures, only 6 of those measures will contribute measure achievement points to your quality performance category score.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.

Reminder: Beginning in the 2022 performance year, there are no bonus points available for reporting additional outcome and high priority measures (beyond the one required) or for measures that meet end-to-end electronic reporting criteria.
When determining which measures are included in the top 6:

- We’ll select the highest scoring outcome measure.
  - If you didn’t have an outcome measure available, then we’ll select the highest scoring high priority measure.
- We’ll then select the next 5 highest scoring measures.
- If you didn’t submit an outcome or high priority measure, we selected your 5 highest scoring measures, and you’ll receive a score of 0/10 for the missing outcome or high priority measure.

When there are multiple measures with the same score, we select measures for the top 6 based on the measure identification number (ID) (in ascending order).

**Example:** You submit 7 measures, and your 2 lowest scoring measures (after the outcome measure) were Measure 113: Colorectal Cancer Screening and Measure 425: Photodocumentation of Cecal Intubation, both earning 3 points. The Colorectal Cancer Screening measure will be included in the top 6 because its measure ID (113) has a lower value than the Photodocumentation of Cecal Intubation measure (425).

If you submit the same measure through multiple collection types — for example, as a Medicare Part B claims measure and as an electronic clinical quality measure (eCQM) — we’ll select the higher scoring version of the measure based on achievement points. Under no circumstances will 2 versions of the same measure count towards your quality performance category score.

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What Does It Mean When I See a Measure Score of “—”? 
If you reported through the CMS Web Interface, you’ll see “—” as the measure score for measures that were excluded from scoring because there’s no benchmark, or because you didn’t meet the case minimum.

How Can I Access Details About the Measures I Submitted? 
Click the arrow to the right of the measure score to expand and view the measure details, such as measure type, numerator, denominator, and data completeness.

Why Are Measures with Higher Performance Rates Not Counted Towards My Quality Performance Category Score? 
We included your highest scoring quality measures. Please note that scoring is determined by comparing the performance rate to the measure’s benchmark. If you submit 2 measures, each with an

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
85% performance rate, 1 measure may earn 7 points while the other measure earns 10 points, based on the benchmarks for each measure.

**I Reported 6 Measures. Why Was I Scored on Only 5 of Them?**

This occurs if you submitted a measure was suppressed from scoring. This means the measure wasn’t scored and your quality denominator — the maximum number of points available — was reduced by 10 points.

For a complete list of these impacted measures (and their collection types), refer to Appendix D.

**How Do You Calculate My Quality Performance Category Score?**

At the bottom of the Quality page, you can see how we arrived at the points contributing to your final score.

We divide the sum of your achievement and bonus points (only for small practices) by the maximum number of points available to you in the quality performance category, and we add that number to your improvement percent score, if applicable.

Finally, we multiply that number by the category weight.

---

**I Submitted All of the Medicare Part B Claims Measures (or MIPS Clinical Quality Measures [CQMs]) Available to Me. How Do I Know If the Eligible Measure Applicability (EMA) Process Was Applied to My Submission?**

Clinicians who don’t have 6 available quality measures and who report Medicare Part B Claims measures or MIPS CQMs may qualify for the EMA process (PDF, 758 KB). This process checks for unreported, clinically related measures and can result in a denominator reduction in the quality performance category.

If you submitted fewer than 6 Medicare Part B claims measures or MIPS CQMs, the Quality Details page will display a message indicating whether the submission qualified for EMA. Denominator reductions are reflected in the Total Quality Score calculation section.

*Please note:* All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Submission (MIPS CQMS) Doesn’t Qualify for Denominator Reduction

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Submission (MIPS CQMs) Qualifies for Denominator Reduction

If you submitted all available Medicare Part B claims measures or MIPS CQMs and were still scored out of 60 total possible points (or 70 if you participated as a group and were scored on the All-Cause Unplanned Readmission measure), please contact the OPP Service Center for assistance.

Our Small Practice Reported Medicare Part B Claims Measures for Individual Clinicians. Why Were We Scored as a Group?

Small practices only receive a group level score in the quality performance category from Medicare Part B claims if they also submitted group-level data for another performance category or categories.

Where Can I Find Information on the Administrative Claims Quality Measures?

There are 3 administrative claims quality measures in the 2022 performance year, which will only be displayed in feedback if they could be scored.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
• **Hospital-Wide, 30-Day, All-Cause Unplanned Readmission (HWR) Rate for the Merit-based Incentive Payment System (MIPS) Groups.** (This measure replaced the All-Cause Hospital Readmission [ACR] measure.)
  - This measure is automatically calculated for groups, virtual groups, and APM Entities with at least 16 eligible clinicians that meet the case minimum (200 cases).
  - Review the [measure specification (ZIP, 2.8 MB)](#).

• **Risk-standardized Complication Rate (RSCR) following Elective Primary Total Hip Arthroplasty (THA) and/or Total Knee Arthroplasty (TKA) for Merit-based Incentive Payment System (MIPS).**
  - This measure is automatically calculated for individuals, groups, virtual groups, and APM Entities that meet the case minimum (25 cases).
  - Review the [measure specification (ZIP, 1.9 MB)](#).

• **Clinician and Clinician Group Risk-standardized Hospital Admission Rates for Patients with Multiple Chronic Conditions**
  - This measure is automatically calculated for groups, virtual groups, and APM Entities with at least 16 eligible clinicians that meet the case minimum (18 cases).
  - Review the [measure specification (ZIP, 25.5 MB)](#).

If you don’t see these measures displayed in your feedback, then you didn’t meet the criteria above.

---

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What Is Quality Improvement Scoring?

MIPS eligible clinicians can earn up to 10 additional percentage points in the quality performance category based on the rate of their improvement in the quality performance category from the previous year. The improvement score — calculated at the category level and representing improvement in achievement from one year to the next — may not total more than 10 percentage points. If CMS can’t compare data between 2 performance periods, or there’s no improvement, the improvement score will be 0%. The improvement score can’t be negative.

Eligibility for these additional percentage points is determined by meeting the following criteria:

1. Full participation in the quality category for the current performance period in 1 of the following 3 ways:
   - Submits 6 measures (with at least 1 outcome/high priority measure).
   - Submits a complete specialty measure set (which may have fewer than 6 measures; submits all measures in the set).
   - Submits all the measures in the CMS Web Interface.

All submitted measures must meet data completeness requirements.

2. Data sufficiency standard is met, meaning data is available and can be compared:
   - There’s a quality performance category achievement score (the score earned by measures based on performance, excluding bonus points) for the previous performance period (2021 performance period) and the current performance period (2022 performance period).
   - Data was submitted under the same identifier for the 2 consecutive performance periods, or CMS can compare the data submitted for the 2 performance periods.

How Is Improvement Scoring Calculated?

Improvement scoring is calculated by comparing the quality performance category achievement score from the previous (2021) performance year to the quality performance category achievement score for the current (2022) performance year. **Measure bonus points aren’t included in improvement scoring.**

$$\text{Improvement Percent Score} = \left( \frac{\text{Increase Quality Performance Category Achievement Percent Score}}{\text{Prior Performance Period Quality Performance Category Achievement Percent Score}} \right) \times 10\%$$
Traditional MIPS: Improvement Activities

The Improvement Activities page will display the name, weight, and points received for each activity you attested to performing. At the bottom of the Improvement Activities page, you can see how we arrived at the points contributing to your final score.

We divide the sum of the points earned for your medium and high weighted activities by 40 (the maximum number of points available). Then we multiply that number by the category weight. (The screenshot below shows the maximum points possible at 15.)

We’re a Certified Patient-Centered Medical Home. Why Didn’t We Receive Full Credit in the Improvement Activities Performance Category?

If you’re a MIPS eligible clinician practicing in a certified patient-centered medical home, including the medical home model, or a comparable specialty practice, you earn full credit for the improvement activities performance category as long you attested to this during the submission period.

We Were Approved for Reweighting of the Improvement Activities Performance Category. Why Are We Showing 7.5 out of 15 points?

Clinicians who participate in an APM, and groups that include such clinicians, automatically receive 50% credit in traditional MIPS for the improvement activities performance category when data are submitted for the quality and/or Promoting Interoperability performance categories.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Traditional MIPS: Promoting Interoperability

The Promoting Interoperability performance category consists of a single set of measures required for all MIPS eligible clinicians, unless an available exclusion could be claimed.

Each required measure is worth a specified number of points, though the maximum points per measure could change based on reporting exclusions for other measures.

For measures submitted with a numerator and denominator, we calculated a score for each measure by dividing the numerator you submitted by the denominator you submitted for the measure. Then we multiplied the performance rate by the maximum points available for the measure, after which we rounded the value to the nearest whole number.

Click the arrow on the right-hand side of the measure information to see numerator/denominator details or click “Expand All” below Measure Name to see the details of all the measures in that objective.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
At the bottom of the Promoting Interoperability page, you can see how we arrived at the points contributing to your final score. We divided the points earned by 100 (the maximum number of points available); then we multiplied that number by the category weight.

### Why Did I Receive a Performance Category Score of 0 Out of 30 Points When I Qualified for Reweighting?

If a MIPS eligible clinician or group submitted any data for the Promoting Interoperability performance category, CMS scored them according to the data submitted, and the category WASN'T reweighted to 0%. This includes clinicians and groups who started data entry (such as entering a performance period) on the Manual Entry page during the submission period.

**Note:** If you didn't submit data and received a performance category score of 0 out of 30 points but should've qualified for reweighting based on your clinician type, special status, and/or exception status, please contact the [QPP Service Center](#) for assistance.

### Why Did I Receive a Performance Category Score of 0 Out of 30 Points When I Submitted All of My Data?

If you reported Promoting Interoperability data through multiple submission types (for example, manual entry and file upload) and there was any conflicting data, you received a score of 0 out of 30 points for the performance category.

---

**Please note:** All screenshots are for illustrative purposes only. Screenshots don't represent real clinicians, organizations, or payment adjustments.
What Is a CEHRT ID?

The CEHRT identification number (ID) is the CMS Certification ID for your electronic health record (EHR) product(s) proving that they're certified by the Office of the National Coordinator for Health Information Technology (ONC) to the 2015 Edition. 2015 Edition Certified EHR Technology (CEHRT) is required for reporting your MIPS Promoting Interoperability measures and can be found using the [Certified Health IT Product List (CHPL) website](https://chpl.cms.hhs.gov/).

Submissions without a valid CEHRT ID result in a performance category score of zero.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Traditional MIPS: Cost

Why Don’t I See Any Cost Measure Information?

Only clinicians, groups, and virtual groups who could be scored on at least one measure will see cost measure information in performance feedback.

If you don’t see any cost measure details and see a score of “N/A” then your group didn’t meet the case minimum for any cost measures and the weight for this performance category was reallocated to another category.

Clinicians, groups and virtual groups who were approved for reweighting in this performance category can still access measure-level and patient-level feedback if they met the case minimum for at least one cost measure.

How is the Cost Performance Category Score Determined?

There’s a graphic at the bottom of the Cost page showing how we arrived at the points contributing to your final score.

- We sum the points earned for each of the cost measures you could be scored on and divide that by the maximum number of points available (10 x the number of measures you could be scored on.)
- We then multiply that by 30% performance category weight.

In the example below, the organization could be scored on all 24 cost measures available for scoring in the 2022 performance period. (As a reminder, the Simple Pneumonia with Hospitalization measure was announced as excluded via QPP listserv on 6/12/2023.)
Where Can I Find More Detailed Information about Cost Measures?

We'll release patient-level cost measure reports with final performance feedback in August. These reports will include every cost measure on which you could be scored.

APM Performance Pathway: Quality
How Was Our Quality Score Calculated?

We use the following formula to calculate your quality performance category score:

\[
\text{Total Measure Achievement Points} + \text{Measure Bonus Points} + \text{Improvement Score}
\]

If you're a small practice – 15 or fewer clinicians in the practice or APM Entity – then we'll add 6 bonus points to your quality numerator.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
As you scroll down the page, you’ll see all of the measures that contributed to your score. Because the APP requires a specific set of measures, you’ll see “0.00” points for any measure that was required but unreported.

To access measure details, click the caret to the right of the measure score.

At the bottom of the page, you’ll see the calculation to arrive at your quality score.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Why Wasn’t I Scored on All the Quality Measures that I Submitted?

As a reminder, 2 of the quality measures required under the APP were suppressed for the eCQM collection type in the 2022 performance period:

- Quality ID 134 / Preventive Care and Screening: Screening for Depression and Follow-up Plan
- Quality ID 236 / Controlling High Blood Pressure

If you submitted either of these measures as an eCQM, and met data completeness and case minimum requirements, the measure(s) was excluded from scoring and the maximum number of points available in the quality category was reduced by 10 points (per measure). If you submitted either of these measures as both an eCQM and a MIPS CQM, the measure(s) were excluded from scoring for both collection types.

CMS Web Interface measures without an existing benchmark don’t count toward your quality performance category score, as long as you meet reporting requirements for such measures. The following CMS Web Interface measures don’t have a benchmark for the 2022 performance year:

- Quality ID 438 / Statin Therapy for the Prevention and Treatment of Cardiovascular Disease
- Quality ID 370 / Depression Remission at Twelve Months

In the CY 2023 Medicare Physician Fee Schedule Final Rule, we finalized retroactively setting flat percentage benchmarks to score the Preventive Care and Screening: Screening for Depression and Follow-up Plan (Quality ID# 134) measure and the Preventative Care and Screening: Tobacco Use: Screening and Cessation Intervention (Quality ID# 226) measure for the 2022 performance year using our authority under § 1871(e)(1)(A) of the Social Security Act.

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What Is Quality Improvement Scoring?

You can earn up to 10 additional percentage points in the quality performance category based on your rate of improvement in the quality performance category from the previous year. The improvement score — calculated at the category level and representing improvement in achievement from one year to the next — may not total more than 10 percentage points. If CMS can’t compare data between 2 performance periods, or there’s no improvement, then the improvement score will be 0%. The improvement score can’t be negative.

You’ll be evaluated for improvement scoring for the 2022 performance year when you:
- Meet the quality performance category requirements for the current performance year.
- Have a quality performance category achievement score based on reported measures for the previous (2021) performance year.
- Submit data under the same identifier (such as ACO ID or TIN) for the 2 performance years, or if we can compare the data submitted for the 2 performance years.

How Is Improvement Scoring Calculated?

Improvement scoring is calculated by comparing the quality performance category achievement score from the previous (2021) performance year to the quality performance category achievement score for the current (2022) performance year. Measure bonus points aren’t included in improvement scoring.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
APM Performance Pathway: Improvement Activities

Why Can’t I Access Details About the Improvement Activities Performance Category?

There aren’t any details for this performance category because clinicians, groups and APM Entities automatically received full credit under the APP, as indicated by the text on the improvement activities card.

APM Performance Pathway: Promoting Interoperability

We’re a Shared Savings Program ACO. How Did We Get Our Score for the Promoting Interoperability Performance Category?

When reporting the APP as an APM Entity (such as a Shared Savings Program ACO), the MIPS eligible clinicians in the Entity reported their Promoting Interoperability measures as individuals or as a group. We score the required measures just as we do for all other individuals and groups, and then we use those scores to calculate a score for the Entity.

- The APM Entity’s Promoting Interoperability performance category score is an average of the highest score attributed to each MIPS eligible clinician in the APM Entity based on the required measures from their individual or group reporting. If you’re participating as an APM Entity such as a Shared Savings Program ACO, we’ll calculate a score for the APM Entity as a weighted average of the scores received from individual and/or group submissions.

- The APM Entity received up to 15 bonus points if at least one individual or group in the APM Entity reported the optional Query of PDMP measure or any of the optional measures within the Public Health and Clinical Data Exchange objective, but the Promoting Interoperability performance category score can’t exceed 100%.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
How Can We View the Individual Promoting Interoperability Scores for the Clinicians in Our ACO?

You can download a report of these scores from the Overview page. Click **Download PI Scores** on the Promoting Interoperability card.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Facility-Based Scoring

Why Don’t I See Any Facility-Based Scoring Information?

There’s no facility-based scoring available in the 2022 MIPS performance year. In the Fiscal Year (FY) 2023 Inpatient Prospective Payment System (IPPS) /Long-Term Care Hospital Prospective Payment System (LTCH PPS) Final Rule, the Centers for Medicare & Medicaid (CMS) finalized the suppression of several measures in the Hospital Value-Based Purchasing (VBP) Program for FY 2023 due to the effect of COVID-19 on measure performance.

As announced through the QPP listserv on 8/5/2022, we believed that calculating a total performance score in the Hospital VBP Program for hospitals using only data from the remaining measures wouldn’t result in a fair national comparison. As a result, we didn’t calculate a FY 2023 total performance score under the Hospital VBP Program for any hospital.

We use the total performance score from the Hospital VBP Program to calculate facility-based scores for facility-based clinicians and groups in the quality and cost performance categories. The FY 2023 total performance score is what we would use to determine these scores for the 2022 MIPS performance period.

- Because the FY 2023 total performance score from the Hospital VBP Program wasn’t available, we couldn’t calculate MIPS facility-based scores for the 2022 MIPS performance year.

Items and Services

What Is the Purpose of the Items and Services Section of MIPS Performance Feedback?

The Items and Services section of performance feedback provides clinicians with additional information about the healthcare and emergency department (ED) services received by their patients throughout a calendar year (CY). Please note that the Items and Services data is provided for informational purposes only and won’t affect your MIPS performance scores.

How Are You Defining the Types of Items and Services Used by Patients?

We define the types of items and services using Healthcare Common Procedure Coding System (HCPCS) codes. HCPCS codes represent a standard coding system for procedures, supplies, products, and services billed by healthcare providers. The data in the Items and Services section of performance feedback is aggregated by ranges of HCPCS codes.

What Is a HCPCS Code and How Are They Classified by Level?

The HCPCS is a collection of codes that represent procedures, supplies, products, and services that may be provided to Medicare patients and to individuals enrolled in private health insurance programs. The codes are divided into 2 levels:

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
• **Level I HCPCS Codes**: Codes and descriptors copyrighted by the American Medical Association's (AMA) Current Procedural Terminology (CPT®), fourth edition (CPT-4). These are 5 position numeric codes representing services of physicians, non-physician practitioners, and other suppliers.

• **Level II HCPCS Codes**: Alphanumeric codes consisting of a single alphabetical letter followed by 4 numeric digits. Level II HCPCS codes are used primarily to identify products, supplies and services not included in the CPT codes, such as ambulance services and durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) when used outside a physician's office. Level II codes and descriptors are maintained and distributed by CMS.¹

**What Is a CPT Code?**

CPT codes offer healthcare professionals a uniform language for coding medical services and procedures to streamline reporting and increase accuracy and efficiency. All CPT codes have 5 digits and can be either numeric or alphanumeric, depending on the category. As noted above, Level I of the HCPCS is composed of CPT-4 codes, a numeric coding system maintained by the AMA.

---

¹ Healthcare Common Procedure Coding System (HCPCS) Level II Coding Procedures

**Please note**: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
### How Are HCPCS Codes Categorized in the Items and Services Section of Performance Feedback?

In the Items and Services section of performance feedback, the HCPCS codes are categorized as follows:

<table>
<thead>
<tr>
<th>HCPCS Code</th>
<th>Definition of HCPCS Code Ranges</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Level 1 HCPCS</strong></td>
<td></td>
</tr>
<tr>
<td>00000-09999</td>
<td>Anesthesia services</td>
</tr>
<tr>
<td>10000-19999</td>
<td>Integumentary system</td>
</tr>
<tr>
<td>20000-29999</td>
<td>Musculoskeletal system</td>
</tr>
<tr>
<td>30000-39999</td>
<td>Respiratory, cardiovascular, hemic, and lymphatic system</td>
</tr>
<tr>
<td>40000-49999</td>
<td>Digestive system</td>
</tr>
<tr>
<td>50000-59999</td>
<td>Urinary, male genital, female genital, maternity care, and delivery system</td>
</tr>
<tr>
<td>60000-69999</td>
<td>Endocrine, nervous, eye and ocular adnexa, auditory system</td>
</tr>
<tr>
<td>70000-79999</td>
<td>Radiology services</td>
</tr>
<tr>
<td>80000-89999</td>
<td>Pathology and laboratory services</td>
</tr>
<tr>
<td>90000-99999</td>
<td>Evaluation and management services</td>
</tr>
<tr>
<td><strong>Level 2 HCPCS</strong></td>
<td></td>
</tr>
<tr>
<td>HCPCS A</td>
<td>Transportation services including ambulance, medical &amp; surgical supplies</td>
</tr>
<tr>
<td>HCPCS B</td>
<td>Enteral and parenteral therapy</td>
</tr>
<tr>
<td>HCPCS C</td>
<td>Temporary codes for use with outpatient prospective payment system</td>
</tr>
<tr>
<td>HCPCS E</td>
<td>Durable medical equipment (DME)</td>
</tr>
<tr>
<td>HCPCS G</td>
<td>Procedures or professional services (temporary codes)</td>

**Please note:** All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
What Data Are Being Used in the Items and Services Section of Performance Feedback?

The Items and Services section of performance feedback uses Medicare Part B professional claims (Claim Types 71 and 72) billed with dates of services between January 1, 2022, and December 31, 2022, and received by CMS within 60 days of December 31, 2022 (a “60-day runout”).

<table>
<thead>
<tr>
<th>Item/Service</th>
<th>Beneficiaries</th>
<th>Cost</th>
<th>Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anesthesia Services</td>
<td>200</td>
<td>$12,000</td>
<td>301</td>
</tr>
</tbody>
</table>

How Is the Number of “Beneficiaries” Displayed in the Items and Service Section of Performance Feedback Derived?

For individual clinicians, this number includes all unique Part B-enrolled patients who received at least one service of any type from the individual clinician (identified by TIN/NPI) during CY 2021 AND at least one qualifying service (identified by relevant CPT code within the designated range) from any clinician during CY 2022.

For groups, this number includes all Part B-enrolled patients who received at least one service of any type from any individual clinician (identified by TIN/NPI) who reassigned their billing rights to the group (identified by TIN) during CY 2022 AND received at least one qualifying service (identified by relevant CPT code within the designated range) from any clinician during CY 2022.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
How Is the “Cost” per CPT Code Range in the Items and Service Section of Performance Feedback Derived? Is the Cost Adjusted and/or Price Standardized?

The cost reflected in the Items and Services section of performance feedback is the sum of all positive allowed charge amounts for the related HCPCS/CPT codes on Part B professional claim lines with dates of service 1/1/2022-12/31/2022. These numbers are raw allowed charge amounts and aren’t payment standardized, risk adjusted, or specialty adjusted.

For individual clinicians, the number is the sum of all Part B-enrolled patients’ allowed charge amounts on professional claim lines for patients who received at least one service of any type from the individual clinician (identified by TIN/NPI) during CY 2022 AND at least one qualifying service (identified by the relevant CPT code within the designated range) from any provider during CY 2022.

For groups, this number is the sum of all Part B-enrolled patients’ allowed charge amounts on professional claim lines with allowed charges for patients who received at least one service of any type from any individual clinician (identified by TIN/NPI) who reassigned their billing rights to the group (identified by TIN) during CY 2022 AND received at least one qualifying service (identified by relevant CPT code within the designated range) from any clinician during CY 2022.

How Is the Number of “Services” in the Items and Services Section of Performance Feedback Derived?

For individual clinicians, the number of services reflected is the sum of all Part B-enrolled patients’ service unit quantity counts on professional claim lines with positive allowed charges for patients who received at least one service of any type from the individual clinician (identified by TIN/NPI) during CY 2022 AND received at least one qualifying service (identified by the relevant CPT code within the designated range) from any clinician during CY 2022.

For groups, this number is the sum of all Part B-enrolled patients’ service unit quantity counts on professional claim lines with allowed charges for patients who received at least one service of any type from any individual clinician (identified by TIN/NPI) who reassigned their billing rights to the group (identified by TIN) during CY 2022 AND at least one qualifying service (identified by the relevant CPT code within the designated range) from any clinician during CY 2022.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
Emergency Department Utilization

Which Patients Are Counted in the “Patients Associated with Your Practice” Entry Under the “Emergency Department Utilization” Heading?

In this context, “patients associated with your practice” is defined as patients attributed to an individual clinician’s TIN/NPI or to a group’s TIN (depending on the chosen level of reporting) via the following method:

Patients are attributed to a single TIN/NPI based on the amount of primary care services received, and the clinician specialties that performed those services, during the performance period.

Only patients who received a primary care service during the performance period can be attributed to a TIN/NPI. A patient is attributed to a single TIN/NPI or a single entity’s CMS Certification Number (CCN) assigned to either a Federally Qualified Health Center (FQHC) or Rural Health Clinic (RHC) in 1 of 2 steps, described below.

Note: If a patient is attributed to an FQHC’s or RHC’s CCN, then that patient and their services aren’t included in the provision of Items and Services data for an individual MIPS eligible clinician or group.

**Step 1:** If a patient received more primary care services from an individual TIN/NPI that's classified as a primary care physician (PCP), nurse practitioner (NP), physician assistant (PA), or clinical nurse specialist (CNS) than from any other TIN/NPI during the performance period, then the patient is attributed to that TIN/NPI. If, during the performance period, a patient received more primary care services from an entity’s CCN than from any other TIN/NPI, then the patient is attributed to the CCN.

**Step 2:** If a patient didn’t receive a primary care service from a TIN/NPI classified as a PCP, NP, PA, or CNS during the performance period, then the patient may be assigned to a TIN/NPI.

Please note: All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
In “Step 2.” If a patient received more primary care services from a specialist physician’s TIN/NPI than from any another clinician’s TIN/NPI during the performance period, then the patient is assigned to the specialist physician’s TIN/NPI.

For a list of CMS specialty codes for PCPs and non-physician practitioners included in the first step of attribution, see Appendix F. See Appendix G for a list of medical specialists, surgeons, and other physicians included in the second step of attribution. For a list of HCPCS codes that identify primary care services, please refer to Appendix H.

A patient is excluded from the population measured for the purposes of providing Items and Services data if:

- The patient wasn’t enrolled in both Medicare Parts A & B for every month of the performance period.
- The patient was enrolled in a private Medicare health plan during any month of the performance period.
- The patient resided outside the United States (including territories) during any month of the performance period.
- The patient was enrolled in Medicare Parts A & B for a partial year because they were newly enrolled in Medicare or they died during the performance period.

The case minimum for provision of Items and Services data is 20. For a MIPS eligible clinician participating in MIPS as an individual, 20 patients must be assigned to the individual MIPS eligible clinician’s TIN/NPI for Items and Services data to be provided. For groups of clinicians participating in MIPS as a group, a total of 20 patients must be assigned to TIN/NPIs across the TIN/NPIs under the group’s TIN for Items and Services data to be provided.

**Which Patients Are Counted in the “Associated Patients with Emergency Department Visits” Entry Under the “Emergency Department Utilization” Heading?**

This metric reflects the number of attributed patients who also had an ED visit in CY 2022. An ED visit is defined as any CY 2022 claim with a claim line containing any of the following ED revenue center codes: 0450 – 0459 and/or 0981.

**How Is the “Total Number of Emergency Department Visits” Entry Under the “Emergency Department Utilization” Heading Defined?**

The figure reflects the actual number of ED visits across all attributed patients in CY 2022.

*Please note:* All screenshots are for illustrative purposes only. Screenshots don’t represent real clinicians, organizations, or payment adjustments.
General Questions

Can I Download Feedback Reports?

Yes, you can print performance feedback using the Print button accessible on each page within Performance Feedback. (This feature uses your browser’s native print functionality.) You can also download a spreadsheet with all of your submitted data, even if it didn’t count towards your final score.

What If We Find an Error During Final Score Preview?

If you believe there’s an error with information displayed during the Final Score Preview period, please contact the Quality Payment Program Service Center by email at QPP@cms.hhs.gov, create a QPP Service Center ticket, or call 1-866-288-8292 (Monday – Friday, 8 a.m. – 8 p.m. ET). People who are deaf or hard of hearing can dial 711 to be connected to a TRS Communications Assistant.

What’s a Targeted Review?

A targeted review is a process through which MIPS eligible clinicians, groups, and MIPS APM participants (individual clinicians, participating groups, and the APM Entity) can request that CMS review the calculation of their MIPS payment adjustment factor and, as applicable, their additional MIPS payment adjustment factor for exceptional performance. The 2022 performance year targeted review process will be available in August 2023 when performance feedback is finalized and 2024 payment adjustments are released.

We continue to listen to you and make improvements to the system based on your feedback.

There may be slight variation between the information and screenshots in this document and what you see on your screen.

Contact the Quality Payment Program if you have questions about a discrepancy.

Appendix B: Extreme and Uncontrollable Circumstances Exception Application

Performance Category Reweighting Scenarios

The table below identifies the performance category reweighting scenarios applicable to groups and virtual groups with an approved EUC application for the 2022 performance year. (APM Entities could also submit EUC applications but were required to request reweighting in all performance categories.)

Please note that we have updated the table to reflect the 0% reweighting of the cost performance category for everyone in the 2022 performance year.

- The quality, improvement activities, and/or Promoting Interoperability performance categories could be reweighted due to an approved EUC application.
- The Promoting Interoperability performance category could also be reweighted due to clinician type, an approved hardship exception, or special status.

# Appendix C: Final Score Preview Based on Access

This table provides a snapshot of what you can and can’t view during Final Score Preview based on your access and organization type.

<table>
<thead>
<tr>
<th>With This Access</th>
<th>You CAN</th>
<th>You CAN’T</th>
</tr>
</thead>
</table>
| **Staff User or Security Official for a Practice** *(Includes solo practitioners)* | ✓ View and download group-level ("practice") performance feedback and preview the group's final score  
✓ View and download clinician-level performance feedback and preview their final score (excluding APM participants) | X View APM Entity level performance feedback  
**Example:** If you’re a participant TIN in a Shared Savings Program ACO, you won’t be able to view performance feedback or payment adjustment information for the ACO. You’ll only be able to view feedback on the data submitted at the individual or group level.  
X View performance feedback for your virtual group  
X View payment adjustment data (will be available in August)  
X Access patient-level reports for administrative claims cost and quality measures (will be available in August) |
| **Staff User or Security Official for an APM Entity** | ✓ View and download MIPS performance feedback for the entire APM Entity and preview the final score  
✓ View and download Promoting Interoperability scores for each MIPS eligible clinician in the APM Entity | X View and download payment adjustment data for all clinicians in the APM Entity (will be available in August)  
X Access patient-level reports for administrative claims quality measures (will be available in August) |
| **Staff User or Security Official for a Registry** *(QCDR or Qualified Registry)* | ✓ View preliminary scoring for your clients based on the data you submitted for them (same information that was available during the submission period) | X View performance feedback or payment adjustment information for your clients, which may include:  
 o Data submitted by your clients directly  
 o Data submitted by another third party on behalf of your clients  
 o Data collected and calculated by CMS on behalf of your clients |
| **Clinician Role** | ✓ View your performance feedback for all and preview final scores applicable to all of your TIN/NPI combinations | X View performance feedback for other clinicians  
X View payment adjustment (will be available in August) |

**Please note:** All screenshots are for illustrative purposes only. Screenshot don’t represent real clinicians, organizations, or payment adjustments.

<table>
<thead>
<tr>
<th>Measure 236 / Controlling High Blood Pressure</th>
<th>eCQM (CMS165v10)</th>
<th>eCQM specification was significantly impacted by ICD-10 coding changes. (Note: The other collection types for this measure weren’t determined to be significantly impacted.)</th>
<th>the performance period (January 1 – September 30, 2022) in their submission. CMS will truncate the performance period automatically for Medicare Part B claims reporting. If this measure is submitted as both an eCQM and a MIPS CQM, the measure will be excluded from scoring from both collection types.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measure 238 / Use of High-Risk Medications in Older Adults</td>
<td>MIPS CQM</td>
<td>Quality Measure Implementation Resulting in Misleading Results: During the annual measure revision process, a second submission criteria was added to this measure. As part of the revision, the Quality Data Codes (QDCs) utilized for Performance Met (G9367) and Performance Not Met (G9368) in Submission Criteria 1 were also included as QDCs for Performance Met and Performance Not Met Numerator Options in Submission Criteria 2, which makes it difficult to differentiate which quality action should be attributed to each submission criteria. As a result, when these specific QDCs are submitted, it isn’t known to which submission criteria the specific QDCs are applicable or if each quality action was met. Due to this error, it isn’t</td>
<td>This measure will be excluded from scoring if it's submitted as an eCQM, and your quality denominator will be reduced by 10 points. If this measure is submitted as both an eCQM and a MIPS CQM, the measure will be excluded from scoring from both collection types.</td>
</tr>
</tbody>
</table>
possible to accurately assess numerator compliance.

Suppression Rationale: CMS determined that this measure has undergone a significant change that may result in misleading results, due to the inability to accurately delineate the quality action for each submission criteria. Clinicians, groups, and/or virtual groups won’t be able to correctly document quality actions in the 2022 performance period and would be unable to identify the applicable numerator option for each submission criteria.

(Note: The eCQM specification for this measure wasn’t determined to be significantly impacted.)

<p>| Measure 259 / Rate of Endovascular Aneurysm Repair (EVAR) of Small or Moderate Non-Ruptured Infrarenal Abdominal Aortic Aneurysms (AAA) without Major Complications (Discharged to Home by Post-Operative Day #2) | MIPS CQM | Measure significantly impacted by ICD--10 coding changes | Truncated performance period — those reporting this measure should only include data from the first 9 months of the performance period (January 1 – September 30, 2022) in their submission. |
| Measure 281 / Dementia: Cognitive Assessment | eCQM (CMS149v10) | Measure significantly impacted by ICD-10 coding changes | This measure will be excluded from scoring if it’s submitted, and your quality denominator will be reduced by 10 points. |
| Measure 282 / Dementia: Functional Status Assessment | MIPS CQM | Measure significantly impacted by ICD--10 coding changes | Truncated performance period — those reporting this measure should only include data from the first 9 months of the performance period (January 1 – September 30, 2022) in their submission. |
| Measure 283 / Dementia Associated Behavioral and Psychiatric Symptoms Screening and Management | MIPS CQM | Measure significantly impacted by ICD--10 coding changes | Truncated performance period — those reporting this measure should only include data from the first 9 months of the performance period (January 1 – September 30, 2022) in their submission. |
| Measure 286 / Dementia: Safety Concern Screening and Follow-Up for Patients with Dementia | MIPS CQM | Measure significantly impacted by ICD--10 coding changes | Truncated performance period — those reporting this measure should only include data from the first 9 months of the performance period (January 1 – September 30, 2022) in their submission. |
| Measure 288 / Dementia: Education and Support of Caregivers for Patients with Dementia | MIPS CQM | Measure significantly impacted by ICD--10 coding changes | Truncated performance period — those reporting this measure should only include data from the first 9 months of the performance period (January 1 – September 30, 2022) in their submission. |
| Measure 326 / Atrial Fibrillation and Atrial Flutter: Chronic Anticoagulation Therapy | MIPS CQM | A typographical error was introduced into the measure specifications by the measure steward during the annual measure update. This led to an incorrect denominator exception, which likely will impact reporting and performance of this measure. The denominator exception affected by this typographical error is intended to offer MIPS eligible clinicians/groups a medical reason for not prescribing an FDA-approved oral anticoagulant for denominator eligible patients. Due to this error, the denominator exception now includes a patient population that’s already excluded from the denominator of the measure, and no longer allows a medical exception for denominator eligible patients that weren’t prescribed an FDA-approved oral anticoagulant. | This measure will be excluded from scoring if it’s submitted, and your quality denominator will be reduced by 10 points. |</p>

Appendix E: Cost Measures with Scoring Changes

The following measures have MIPS scoring changes due to changes in clinical guidelines during the 2022 performance period, or because specifications were determined during or after the performance period to have substantive changes.

<table>
<thead>
<tr>
<th>Cost Measure ID/Name</th>
<th>Reason for Measure Change</th>
<th>Impact on Scoring, Submission, and Feedback Expectations</th>
</tr>
</thead>
<tbody>
<tr>
<td>COST_SPH_1/ Simple Pneumonia with Hospitalization</td>
<td>The Simple Pneumonia with Hospitalization episode based cost measure was impacted by the introduction of a new diagnosis code for pneumonia. Specifically, an ICD-10 diagnosis code for pneumonia due to COVID-19 (J12.82) came into effect, including additional guidance on reporting these instances as secondary to COVID-19 (U07.1), in January 2021. These coding changes impacted the scope of pneumonia cases captured by this measure.</td>
<td>This measure will be excluded from scoring and won’t contribute to the MIPS cost performance category score. This measure won’t be included in performance feedback.</td>
</tr>
</tbody>
</table>

Appendix F: Specialty Codes for PCPs and Non-Physician Practitioners Included in the First Step Attribution

<table>
<thead>
<tr>
<th>Specialty Description (CMS Specialty Code)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Primary Care Physicians</strong></td>
</tr>
<tr>
<td>General Practice (01)</td>
</tr>
<tr>
<td>Family Practice (08)</td>
</tr>
<tr>
